## Editorial

Dear Reader,

In any context, but especially in critical times such as the one we are experiencing, no solution to the great problems of humanity does not require the integration and strengthening of cooperation ties between peoples. The intensity of cooperation can happen in a wide to low context. In any case is fundamental the respect for autonomy, or free will, for history, aspirations and living conditions of the peoples.

One of the strong vehicles for integration between peoples is the collaboration between academic researchers through scientific publication. Through science and technology, researchers exchange essential elements, such as epistemologies, theories, morphologies, methodologies, technologies and metrics specific to knowledge. It is in these dictates that knowledge evolves, as can be seen from the evolution of ancient cultures, as seen in the Middle East. It is in this sense that other nations, such as Brazil, have much to learn about the evolution of peoples.

The Journal of Management & Technology expresses its satisfaction and honor in presenting to the scientific communities of the most diverse parts of the world, substantial, robust, consistent, important and opportune contributions of Iranian researchers to the evolution of knowledge in critical foundations of science of management. These are articles that effectively challenge the status quo of each frontier addressed, in the dimensions of theories and methodologies.

In this sense, we would like to thank the authors who believed in the purposes of this journal, submitting their articles in accordance with the criteria and publication processes.

Thus, with these contributions to the academic literature, we express our thanks to all authors, readers and, especially, to FPL Educacional. Awaiting contributions in the form of article submissions, serious evaluations and consistent with the purposes of this journal, referrals to her students and friends, as well as contributory criticism, I renew my wishes for good reading and great reflections.
