Lara, José Edson (2024). Editorial inviting foreign authors to publish in Journal of Management & Technology. Journal of Management & Technology (Revista Gestão & Tecnologia.), v. 24, nº 2, pp. 1-2

Dear reader,

It is with great honor and satisfaction that we make available to our select readership, Edition vol. 24, nº 2 – Special Edition of Journal of Management & Technonoly.

I emphasize that our annual special edition is increasingly special. Thus, all editions in this modality have presented important articles from different regions of the world, except Brazil. The origin is increasingly diverse.

In this issue we offer articles with authors from the Russian Federation, Saudi Arabia, Egypt, Vietnam, Ukraine, Nigeria, Azerbaijan and Croatia. These are articles developed in notable universities and advanced scientific research centers in their countries of origin.

The purpose of this special edition, publishing contributions from other countries, is to place in the same volume epistemologies, theories, morphologies, methodologies, technologies and metrics that contribute to the status quo of knowledge, as well as its advancement. Furthermore, they contribute as a stimulus to authors for investigations, considering references to the realities of other countries and cities, in the context of other subjects and objects of research.

The predisposition to publish an academic journal for this purpose is very consistent with Brazil, in terms of our political, economic, social and demographic diversities, especially in the contexts of our organizations and companies. We are a multi-diverse country in everything. However, the conditions for seeking and sustaining corporate excellence are similar to those in any other country. We have a lot to learn, but we can also express our experiences about the conditions, strategies, structures and results in organizations. Thus, we are a society open to new knowledge and experiences, despite our serious problems, which are already classic.

Our purpose is to continue with these special editions, publishing international articles in our regular editions and special editions, seeking and exercising integrations and opportunities for more sustainable development. It is with this purpose that we try to contribute to evolution, towards a better world to live in.

We request, however, that article submissions comply with the journal's Author Guidelines, that is, compliance with APA (American Psychology Association) Standards. We preferably publish articles resulting from empirical research. We also invite you to observe, among the articles already published, the format and level of approach required for publication.

Reaffirming its purposes, Journal of Management & Technonogy, through this Editorial Board, expresses its satisfaction and honor in presenting these contributions to the scientific communities. It offers, in line with the state of the art in this field, substantial, robust, consistent, important and timely content, provided by researchers, aiming to contribute to the evolution of knowledge in critical foundations of management science. These are articles that effectively challenge the status quo of each frontier addressed, in the dimensions of theories and methodologies. We thank the authors who believed in the purposes of this journal, submitting their articles in accordance with the publication criteria and processes. Awaiting contributions in the form of article submissions, serious evaluations consistent with the purposes of this journal, recommendations from her to her students and friends, as well as contributory criticisms, I renew my best wishes for good reading and excellent reflections.

Keywords: Scientific journal, Academic journal, Administration. Scientific cooperation
